

# Electroculture

The Secret to Faster Growth, Larger Yields & More...  
Using Electricity!

Natural & sustainable crop enhancement solutions

Crop Acceleration

Optimal Plant  
Health

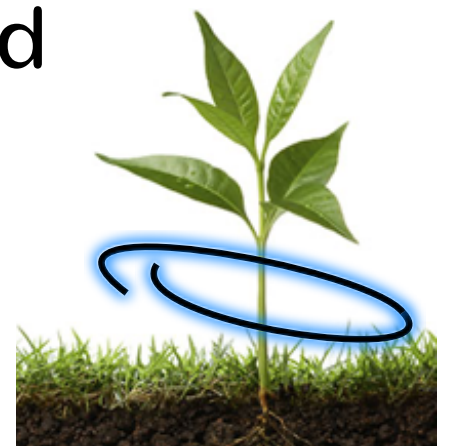

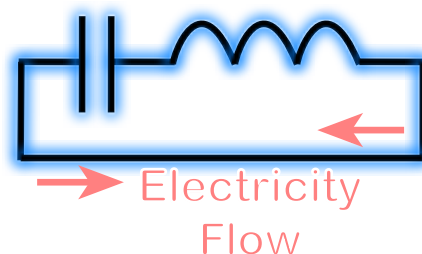

Boosted Yields &  
Greater Returns

## The Lakhovsky Coil Method

Ever notice how  
your plants and  
crops look more  
vibrant and larger  
after a passing  
thunderstorm?

Using simple  
technology, you  
can replicate those  
effects, using  
electro-magnetism!

Capacitor Inductor

Antenna coil collects radio waves and  
transforms it to electromagnetic  
energy to improve plant health.

Method: Simply wrap 1+ turns of wire  
around a plant or tree, leaving bare  
wire overlapping or separated at the  
ends.
