Boosted Yields & Greater Returns

HarvestStorm's Pulsed DC Crop Stimulator

Use low-voltage 15Hz pulsed direct-current (DC) electricity to give your plants an extra boost!

Features:

- Blinking LED, flashes in sync with the stimulation signal
- Replaceable 1/8" carbon-steel electrode rods.

Range of Influence:

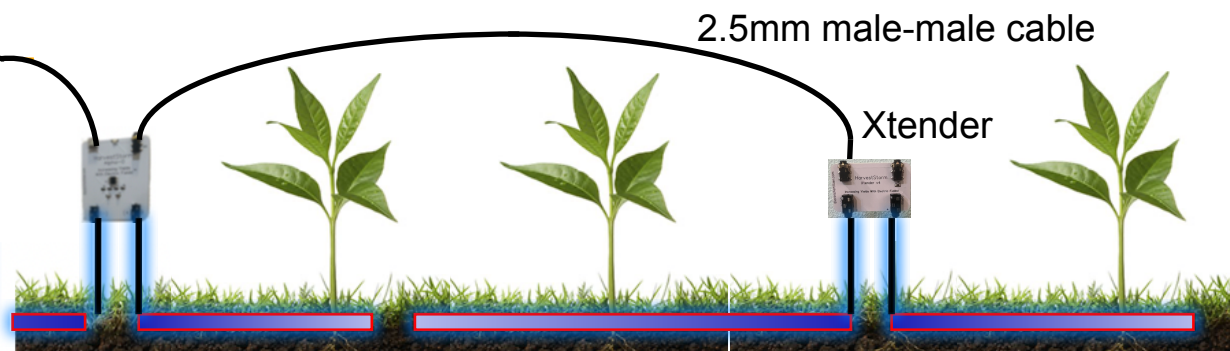

3 - 8 feet in radius, depending on factors like soil conditions, plant stim receptivity, etc.

Plug & Play!

Connect USB power cable to the device and to a power source, e.g. wall power supply (included), or USB solar panel. Insert electrodes into the soil!

Expand It!

Connect to one or more HarvestStorm Xtender units for more range, or to test multiple sets of plants at the same time.
